

Elekta Neuromag® TRIUX™

Article No : NM23900N

Elekta Neuromag® TRIUX™ is a state-of-the-art magnetoencephalography platform that raises functional mapping to the next level. Elekta Neuromag® TRIUX™ addresses key MEG requirements that are critical for robust functional mapping studies:

- A significant boost of the dynamic range and integrated internal active shielding system for a new level of robustness
- Several features designed to simplify day-to-day use of the system and enhance the patient's experience
- A time-proven triple sensor array to maintain full compatibility with the wealth of research conducted by the expanding Elekta Neuromag user community
