

Titanium Fixation Screw, 80 mm

Article No : 709674

A vertical strip on the left side of the page shows a close-up of a titanium fixation screw being used on a patient's skull. The screw is metallic and has a hexagonal head. It is being inserted into the bone, with a small amount of blood visible around the entry point.

Screws are available in different lengths to accommodate any patient head size or shape and locate the Leksell® Coordinate Frame at any required position on a patient's skull. This article number consists of one fixation screw L=80 mm. Minimum order is two screws.
