Target Simulator

Article No : 1000810

With the unique Target Simulator you will always have confidence in the accuracy of your Leksell Stereotactic System®. It is designed for mechanical accuracy check using visual inspection. The easily performed procedure can be carried out on a regular basis. The accuracy check is also of value if the stereotactic system may have been subject to mishandling or if some components have been exchanged. The solid targets of Target Simulator represent typical brain target locations.

Consisting of

- Fixation Screw M10
- Transportation case assembly
