BodyFIX Vacuum Pump P3

The BodyFIX® Vacuum Pump P3 is a high-performance vacuum pump that controls the patented dual-vacuum technology, used for precise patient positioning and immobilization of the BodyFIX® System (includes all necessary parts).

The BodyFIX® Vacuum Pump P3 can be used for several working voltages by simply changing it with the voltage selector. Possible settings are 100 V, 120 V (110 V), 230 V (220 V) and 240 V.
